Dear [Hiring Manager's Name],

Application for the Position of Senior Software Engineer

It is with great enthusiasm that I submit my application for the position of **Senior Software Engineer** at XYZ Company. Through my 8-year career, I've come to specialise in developing, testing and delivering over 10 scalable and reusable enterprise web applications for start-ups and SMEs across the Fintech, Banking and Insurance industries. I particularly excel in Java, Python and JSON, and building RESTful web services. I'm experienced in leading multiple cross-functional development teams of up to 15 using various Agile methodologies, namely Kanban, FDD and DSDM. As such, I am confident that I will be able to continue designing secure, scalable and maintainable software that enables XYZ Company to achieve its business objectives.

- Presently, I am a **Senior Software Engineer** with ABC Software, where I direct teams of up to 8 full-stack developers, overseeing end-to-end software development life cycle of our 3 core products, used by over 130 clients. Amongst my various achievements during my tenure, I am most proud of driving the software development life cycle for 2 core products that are used by >50K end users, contributing to 85% of ABC Software's monthly revenue stream. I oversaw the entire software development life cycle of both projects, from requirements gathering to final rollout.

XYZ Company has been heralded by many technological publications as the future of electronic payments. Industry pioneers such as PayPal and Square have also shared that XYZ Company is championing the innovation and development of secure and transparent electronic payments. My extensive background and knowledge in Fintech and the financial industry, coupled with my technical expertise and practical experience in product development will allow me to effectively drive the development of secure and scalable projects that are built with high quality code.

I am thrilled at the possibility of being part of such a renowned firm, and would love the opportunity to meet with you and discuss the value that I can bring to XYZ Company. I appreciate your time and consideration, and I look forward to hearing from you. Please feel free to contact me at any time via mobile at +852 91234567 or by email at name@gmail.com.

Yours sincerely,

James Lee
